Professional Summary

Results-driven Backend Developer (Node.js) with 4.5+ years of experience designing and building scalable REST APIs, working with SQL/NoSQL databases, deploying cloud workloads on AWS, and delivering real-time production-grade applications. Strong understanding of software architecture, microservices, and system design.

Experienced in AWS infrastructure, database optimization, authentication systems, and automated testing, with hands-on expertise in developing backend solutions for hyperlocal commerce, IoT platforms, and enterprise systems. Currently preparing for AWS Certified Solutions Architect – Associate (SAA-C03) to further strengthen expertise in cloud architecture and scalable system design.

Professional Experience

Software Developer

Dream Filler Software Solution Pvt. Ltd.
September 2021 – Present

- Designed and developed scalable REST APIs using Node.js, Express.js, and PostgreSQL for production applications.
- Built backend modules for hyperlocal commerce platforms, POS systems, and real-time applications.
- Implemented secure role-based authentication using OAuth2, JWT, and access/refresh token strategies.
- Integrated Firebase for push notifications and AWS S3 for file and image storage.
- Developed real-time notification systems using WebSockets and Socket.IO.
- Designed and optimized database schemas and queries for PostgreSQL, MongoDB, and MySQL.
- Managed cloud deployments on AWS infrastructure including EC2, RDS, S3, Lambda, and API Gateway.
- Wrote unit and integration tests using Mocha and Jest to ensure application stability.
- Mentored junior developers and collaborated with QA and UI teams during Agile sprint cycles.

Projects

QIKLET – Hyperlocal Marketplace & POS Platform | Backend Developer

- Developed scalable REST APIs using Node.js, Express.js, and PostgreSQL for shops, products, orders, and delivery workflows.

• Implemented real-time order notifications using Socket.IO and integrated Firebase & AWS S3 for push notifications and media storage.

BROAN & NUTONE – IoT Device Platform | Backend Developer

• Built backend APIs for IoT device onboarding, telemetry processing, and remote device control using Node.js and PostgreSQL.
• Integrated AWS IoT Core and MQTT protocol for real-time device communication and monitoring.

AGE INDUSTRIES – BLDC FAN IoT Platform | Backend Developer

• Developed backend services enabling remote monitoring and control of smart BLDC fans using Node.js APIs.
• Implemented MQTT-based communication and telemetry data processing for device management and analytics.

AWS Infrastructure Cost Optimization | Cloud Engineering Project

• Migrated production workloads from Windows-based EC2 servers to Linux infrastructure improving performance.
• Optimized AWS architecture and networking configuration, reducing cloud costs by more than 60%.

Education

Bachelor of Engineering – Computer Science
Bansal Institute of Research and Technology, Bhopal
2014 – 2018 | CGPA: 6.63 / 10

Higher Secondary Education
Holy Child Convent Hr. Sec. School, Satna
2013 – 2014 | Percentage: 61%

Technical Skills

• Languages: JavaScript, Python

• Frameworks: Node.js, Express.js

• Cloud / DevOps: AWS (EC2, RDS, S3, Lambda, API Gateway, AWS IoT), CI/CD

• Databases: PostgreSQL, MongoDB, MySQL

• Architecture: REST, MVC, Microservices, Event-Driven Architecture

• Tools: Git, Postman, Firebase, ActiveMQ, MQTT.fx

• Testing: Mocha, Jest

- **Other Skills: OAuth2, JWT Authentication, Sequelize ORM, Socket.IO, Cron Jobs, NoSQL**

Certifications

- **Preparing for AWS Certified Solutions Architect – Associate (SAA-C03)**

Additional Information

- **Strong communication and problem-solving skills.**
- **Comfortable working in Agile, remote, and cross-functional teams.**
- **Fast learner and adaptable to new technologies and frameworks.**
